

Office Automation, Document & Correspondence Management System for Ministry of Justice

To manage and maintain an automated correspondence management system for the entire organization, as part of process automation. The Correspondence management system follows a specific process flow specified according to roles and responsibilities for various sections, departments & DGs of the organization.

Overview:

The customer, Ministry of Justice is the government body that handles the activities related to laws and legislations applied in the particular country. It undertakes the whole legislative related activities of the whole country. It is responsible for implementation of laws, formulated by the government.

Challenge:

Government authorities such as Ministries receive many applications for correspondence on a daily basis. Based on the rules and regulations designed by the particular ministry, the passage or flow of such applications received takes place. Traditionally paper documents used to pass through each department. Day to day, it is becoming difficult to manage such correspondences through traditional methods for all such departments. With the advent of technology, things changed and automated processing came in to place.

Methodology & Approach:

AL TOMOUH implemented its enterprise collaboration and communication suite eoffice to automate ministries processes and also document and record management requirements. eOffice is a paperless office with functionality records, document & drawing management, document registration, electronic folders, security controlled by Active Directory, automatic updating of user profile information from the active directory, user permissions, audit trails, version control, web browser access, maps & plans scanning, annotation & editing and many more. It is an end to end office automation solution through which all the incoming and outgoing correspondences (emails, faxes, documents, maps, plans and softcopy files) are maintained in a single repository.

eOffice is a real time enterprise automation system that integrates faxes, emails and digitized physical documents into a single application. This will facilitate better productivity and an enhanced work environment. Employees work on a single window and do not waste time on searching for information to complete their tasks. This will reduce operational costs and increase bottom-line profits for the stakeholders.

Outcomes & Conclusion:

Online correspondence application process is helpful for both organizations and users who approach ministries on various tasks.

Easy processing as the correspondence applications directly arrive at the concerned departments.

Easy movement of application from each concerned departments based on pre-defined flow.

Easy storage of all such information for future use.

Easy retrieval of such information when-ever required.
